

For large PDP masks

(For image printing exclusive use)

Large screen exposure machine

MODEL SP-2500F

- The exposure machine developed for a large-sized screen plate
- High transfer accuracy by artificial parallel light system of Fresnel lens
- Illumination unevenness is prevented by a special designed optical processing
- Thereby, high developing work and the stable quality of finished goods are obtained
- Adhesion (Contact) adopted the original sticking-by-pressure system (Cylinder Press Method), and the ideal contact movement to a field from a point has been attained

*About the exposure outside effective area, auxiliary exposure equipment (Printer aids) is required eparately.

Custom-made products are available for maximum frame size. Please contact us for detail.

■ Main specification

| | |
|----------------------------|--|
| Valid size for platemaking | 1420 x 1095mm |
| Maximum Frame Size | 2500 x 2500mm |
| Light source | Instant lighting type metal Halide lamp 6KW (air cooling) |
| Exposure Light system | Computer control, Maximum of 9ch. (addition actinometer use) |
| External dimensions | 2700(W)x2600(D)x3200(H)mm |
| Weight | 950Kg |
| Power source | Single-phase 200V 50A |
| Air Source | Above 5kg/cm(primary measurement) |

* Specifications and design details may be subject to change. C-No. E100802M
