

Coating Machine

MODEL CM-1200A

It is a full-automatic emulsion coating machine for medium size screen plates. It is newly developed based on our long cultivated know-how and original theory. It is numerically control system that unskilled workers can operate easily.

Custom-made products are available for maximum frame size. Please contact us for detail.

■ Main Specification

Coating form	Double face coating, single face coating, single face alternate coating, single or double face combination coating, weight pressing method
Frame size	800×800~1200×1200(mm), t=30~50
Coating area	Up to 1000×1000(mm)
Frequency setting	0~99times(single side), 0~9 times(both sides)
Numerical control	Frame size, speed, coating range by touch panel.
Registered file	99
Outer dimensions	1960(W)×800(D)×1930(H)mm *without rotary beacon light and switches
Mass	300Kg
Power source	3 phase AC200V 15A
Air supply	5kg/cm ² (primary measurement) or above

* Specifications and design details may be subject to change. C-No. E100730M
